

# México

Panel: Seed industry perspectives on phytosanitary regulations

# Agenda with SENASICA

- Pest Risk Analysis
- Revision of phytosanitary requirements and procedures for seed imports and exports
- Projects to Support our NSA's work with our NPPO

# Pest Risk Analysis

- SENASICA has a PRA procedure in place
  - PRA – product – origin
- More than 80 seed PRA requests from AMSAC member companies.
- Agreement with CONACOFI (Consejo Nacional Consultivo Fitosanitario) to assist SENASICA with PRA elaboration.
  - 36 cases on the list

# Phytosanitary requirements and procedures

- Procedures to import non-treated seed
- Alternatives to hot water treatment
- Laboratories for seed sample analysis
- Seed re-exporting
- Compliance agreements for small seed lots

# Projects to Support our NSA's work with our NPPPO

- Risk – based sampling (ongoing)
  - Database analysis of imports from 5 years (product – origin – pest detection)
  - Reduce sampling frequency and establish sample sizes
- Seed exporting requirements database (ongoing)
- Systems approach (2025)
